

INTERNAL PIPE COATING

Through its rigorous development program, WIWA offers multiple solutions and custom tailored units for internal and external pipe coating with single and plural-component materials.

- Internal pipe coating using automatic spray guns mounted to manual or automated lance assemblies.
- Internal coating of subterranean pipe using robotics and a rotary atomizer.
- Various rotary atomizers for pipe diameters from 40 mm to 2000 mm available.
- Capable of coating pipe bends and junctions using a rotary atomizer and manual lance.
- Specialized application equipment for coating cast pipe couplings (80-1000 mm diameter).

WIWA - Your partner for state-of-the-art coatings application equipment. For both standard and custom requirements, WIWA has the solution!
